

***part a**

interlocutor(问话者):

1、最喜欢的课程:

One of my favorite courses should be C language, because this course is the first one that lets me enter the programming world. At that time, because our lecturer pays great attention to practice, he often helps us debug the code himself, which also makes me feel the joy of programming for the first time. It has an impact on my subsequent research competition and finally has achieved more than 90 points, which impresses me.

2、大学里参加过的活动

The university participated in the basketball game. At that time, it was not officially playing basketball, but shooting, and shooting can add points to the class basketball game. At that time, after class, several of our shooting girls went to practice, hoping not to delay the class. Finally, when formally playing, we played a high level, and scored many goals than usual. So our class won the second place in the basketball game. we are also very happy to make a certain contribution to the class.

3、你的爱好

Jagging because that not only relieve my stress, but also give me a healthy body, which is the foundation of evering

-----good morning. my name is, and this is my colleague.....he is just going to listening to us .are your name is.....?

-----first of all, we'd like to know sth. about you, so I'm going to ask some questions about yourself.

4、介绍你的学校专业

(从以下各项问题中选择几个适当的问题提问考生)

-----hometown

where are you from? I come from qiqihar city, heilongjiang province

how long have you lived there? I have lived here since childhood.

how do you like it? why? I like the northeast very much, because people here are very warm, the most important is the food is also very delicious, although winter is a bit cold, but snow is very beautiful

do you live near here? where about?

what do you think are the good points about living in this city? The northeast people are very warm and hospitable. Welcome to the northeast to play. There are ice sculptures and special dishes that are not easy to see elsewhere. Of course, the northeast dialect is also very humorous. It is a good medicine to cure the mood.

-----family

could you tell us sth. about you family? Our family is a typical northeast-style family. My father is gentle, but my mother is strict. There are four people in the family. I have a sister who is 12 years older than me. Therefore, I have been loved by my family since childhood. My parents will also give me the opportunity to make decisions. The family atmosphere is relatively free from childhood.

what does your family usually do for the weekend? because Dad is a teacher, so he will take a holiday every weekend but my mother will sometimes work overtime. Of course, if she takes a holiday, she will go to the square dance. My father usually cooks with me at home. Because we prefer to eat, we always study some new dishes.

what do you think about living together with your parents? Because I have been living outside since primary school, so relatively less time with my parents, I personally more independent. Perhaps some people think that living with parents will be inconvenient, but for me, I cherish the time of living with parents. If I do not become a family in the future, I will also choose to live with my parents and take care of them conveniently.

-----leisure

do you have any hobbies? I like Chinese painting and calligraphy, because my grandfather is a teacher of calligraphy, so I have been influenced from childhood. Before high school has been the art team, in the university also used painting technology to design posters, has been adopted by the organization.

how did you become interested in the hobbies? I gradually like calligraphy.

-----study/work

why do you choose to study at our institute? Nankai school motto : fair, ever-changing. First of all, Nankai University has been adhering to the cultivation of students with modern talents, not only requires the ability of modern theory, but also requires the ability of practical work, which makes the learning atmosphere of Nankai University very strong, of course, the most attractive place is the strong strength of computer science in your university, I studied in computer science in undergraduate, have a strong interest in the subject, hope that in the graduate stage can have deeper learning and research.

why do you want to go to graduate school instead of finding a job? First of all, in the process of learning in the past few years, I have established a strong interest in computer science. However, the undergraduate study is far from enough, so I hope to learn more professional knowledge through research. The computer specialty of Nankai University has always been the subject platform that I dream of. I want to exercise my scientific research ability through the study in the next few years, hoping to get the guidance of teachers.

what are your favorite subjects? I prefer mathematics because he exercises logical thinking ability and is essential for computer programming to have a strong logical thinking.

what kind of job did you do?

have you ever worked during the vacation?

why do you want to go back to study instead of going on with your work?

what qualifications are needed in order to do your job well? First of all, you must have a belief is to do this work well, don 't think of yourself can not, it is the need for self-confidence, and to endure loneliness, in order to adhere to, constantly break through yourself.

what did you enjoy most about your campus life? First of all, universities and high schools are different, and no one will always urge you. To complete self-improvement,

self-restraint must be carried out. For relatively independent me, I prefer to be able to determine the degree of daily efforts by myself. In addition, university life is more free. In addition to learning, there can be many community life. One is to enrich their extracurricular life, and the other is to exercise their social skills.

-----future plans

what do you expect to achieve during your study if you are enrolled into this institute? First of all, I will complete my studies and achieve excellent results. Then, I will deeply study the direction of my tutor's topic, so as to find my own research topic. Through continuous learning, I will eventually publish high-quality and influential papers to make myself a competent and qualified graduate student.

do you think english is important for your future plans? in what aspects is it important?

If a graduate student wants to do his own research, he must first learn to read various references, and some of the more authoritative international papers are written in English, which requires us to have good English ability, and to be skilled in use to ensure that he can also complete high-level papers.

part b

interlocutor(问话者):

-----now i'd like you to talk about sth. for about 3 minutes.

here is a list of topics(将一组话题或问题递给学生), pls read the topics and choose one from the list you like to talk about. you'll have 5 minutes to prepare for your talk.(5 分钟后)could you tell me what you want to talk about? all right, you'll have 3 minutes to give your talk. would you begin?(the interlocutor may intervene only when necessary)

topics/questions(只列举了一部分话题)

-----give your comment on the statement that "a part-time job is an important experience that every college student should have."

First of all, in my view, I believe that part-time jobs are not necessary for every college student, and that some part-time jobs can be done for students who have residual energy besides completing their learning tasks, which can also exercise their practical ability. However, I do not believe that this is necessary, and the main energy should be placed on learning.

-----use specific examples to set forth your views on the saying "haste makes waste".

-----describe one of your own experiences to demonstrate that "nothing ever becomes real till it is experienced"

For example, before I took part in a competition, it was a bit cross-disciplinary, because I specialized in software, but that involved a lot of hardware knowledge, I did not believe that I could get a place in this competition, but the teacher had always encouraged me to do it, and I also seriously prepared it. Finally, I won the second prize second prize of the, and it was proved that as long as you did it, you would realize what you could not do.

-----explain your understanding of the conventional belief that "age brings wisdom"

-----what are the current problems of college education? how to resolve them?

-----some people say there is no absolute truth because “truth” is defined by people and there is no objectivity whenever people are involved. does absolute truth exist or not ?why?

对策

1. 自我介绍(self-introduce)

Good morning. I am glad to be here for this interview. First let me introduce myself. My name is ***, 24. I come from ***,the capital of ***Province. I graduated from the *** department of ***University in July ,2001.In the past two years I have been preparing for the postgraduate examination while I have been teaching ***in NO.***middle School and I was a head-teacher of a class in junior grade two.Now all my hard work has got a result since I have a chance to be interview by you .

I am open-minded ,quick in thought and very fond of history.In my spare time,I have broad interests like many other youngsters.I like reading books, especially those about **.Frequently I exchange with other people by making comments in the forum on line.In addition ,during my college years,I was once a Net-bar technician.So, I have a comparative good command of network application.I am able to operate the computer well.I am skillful in searching for information in Internet.I am a football fan for years.Italian team is my favorite.Anyway,I feel great pity for our country’s team. I always believe that one will easily lag behind unless he keeps on learning .Of course, if I am given a chance to study ** in this famous University,I will spare no effort to master a good command of advance **.

2.读研原因 (reasons for my choice)

There are several reasons.

I have been deeply impressed by the academic atmosphere when I came here last summer. In my opinion, as one of the most famous **in our country, it provide people with enough room to get further enrichment . This is the first reason.

The second one is I am long for doing research in **throughout my life. Its a pleasure to be with my favorite **for lifetime. I suppose this is the most important factor in my decision.

Thirdly, I learnt a lot from my **job during the past two years. However, I think further study is still urgent for me to realize self-value. Life is precious. It is necessary to seize any chance for self-development, especially in this competitive modern world.

In a word, I am looking forward to making a solid foundation for future profession after two years study here.

3.研究生期间你的计划 (plans in the postgraduate study) First, I hope I can form systematic view of **. As for **, my express wish is to get a complete comprehension of the formation and development as well as **. If possible, I will go on with my study for doctorate degree.

In a word, I am looking forward to making a solid foundation for future profession after two years study here. (简单了一些,望高手补充)

4. 介绍你的家乡 (about hometown) I am from Fuzhou, a famous city with a long history over 2,200 years. It is called "Rong Cheng " because there were lots of banians even 900 years ago. The city lies in the eastern part of the province. It is the center of politics, economy and culture. Many celebrities were born here, for instance, Yanfu, Xie Bingxin, Lin Zexu and so on . . You know, there is a saying that "The greatness of a man lends a glory to a place". I think the city really deserves it. The top three artware are Shoushan Stone, cattle-horn combs and bodiless lacquerware. In addition, it is famous for the hot springs. They are known for high-quality. Visitors at home and abroad feel it comfortable bathing here. There is my beloved hometown.

5. 你的家庭 (about family)

There are four members in my family; my parents, my cute cat of 9 years old and me. My father is a technician in the Fujian TV station. He often goes out on business. So most of the housework is done by my industrious mom. Climbing at weekends is our common interest. The fresh air and natural beauty can help us get rid of tiredness. They can strengthen our relation, too. During my preparing for coming here, my parents' love and support have always been my power. and I hope in future I will be able to repay them.

6. 你的大学 (about university) *****University is the oldest one in the province. It was founded in *****and covers an area of over***** mu. The building area is *****square meters. It develops into a comprehensive university with efforts of generations, especially after the reform and opening up. It takes the lead among the *****universities with nice teaching and scientific research ability. The library has a storage of *****books. . various research institutes are set up including 52 research centers. There are teaching research experimental bases. For example, the computer center, analyzing-test center, modern education technical center and so on.

<https://www.zhihu.com/question/63624626/answer/1951325541>

2、为什么选择这个专业：

智能装备是人工智能技术、新兴信息技术和先进制造技术的创新集成和深度融合，是高端装备制造业的重点方向之一。我相信智能装备的设计、研发与制造是当今衡量一个国家工业化水平的重要标志，我对这个专业也非常感兴趣，希望能够成为这个方向的人才

Intelligent equipment is the innovation integration and deep integration of artificial intelligence technology, emerging information technology and advanced manufacturing technology, and is one of the key directions of high-end equipment manufacturing industry. I believe that the design, R & D and manufacturing of intelligent equipment is an important symbol to measure the level of industrialization of a country today. I am also very interested in this major hoping to become talents in

this direction.

1、交叉学科的优势：

我从以下几个方面进行回答，交叉学科专业使得学生对于专业的选择范畴更广泛。交叉学科专业的毕业生在知识体系和职业技能方面相比单一专业的学生会更有竞争力。很多交叉学科的教授都是学术界的佼佼者。选择的行业多，就业面广。

I answer from the following aspects. Cross-disciplinary majors make students choose a wider range of majors. Interdisciplinary graduates will be more competitive in knowledge system and vocational skills than single majors. Many interdisciplinary professors are outstanding academics. There are many industries to choose and a wide range of employment.

2、前沿方向：

我国的智能制作设备与发达国家相比还存在一定差距，比如创新能力薄弱、先进控制技术受制于人，我了解到的可以提升的技术包括工业软件、传感器技术、通信技术、人工智能、物联网、大数据分析等。在这些方向上面进行创新技术的提升

There is still a certain gap between China 's intelligent production equipment and developed countries, such as weak innovation ability, advanced control technology and so on. The technologies that I know can be improved include industrial software, sensor technology, communication technology, artificial intelligence, Internet of Things, big data analysis and so on. Upgrade innovative technologies in these directions

3、项目：

我的项目名称是基于 ArcGIS 的新冠肺炎动态信息发布与展示平台的设计与实现，该项目旨在对基于 ArcGIS 的新冠肺炎数据进行可视化。我们基于出行行为对感染风险进行评估，对携带者和非携带者构建了全出行链行为分析模型。通过应用贝叶斯公式建立感染风险概率与出行行为的关联联系，实现了疫情期间的出行感染风险的全面评估。

My project name is the design and implementation of the novel coronavirus pneumonia dynamic information release and display platform based on ArcGIS. This project aims to visualize the novel coronavirus pneumonia data based on ArcGIS. By applying Bayesian formula to establish the correlation between the probability of infection risk and travel behavior, the comprehensive evaluation of travel infection risk during the epidemic period is realized.

最难忘的科研经历：

One of my most unforgettable scientific research experiences is a project in my sophomore year. The name is the design and implementation of the novel coronavirus pneumonia dynamic information release and display platform based on ArcGIS. The project aims to visualize the data of new coronary pneumonia based on ArcGIS. Why is it unforgettable, because this is the first project I participated in, because I was at home during the epidemic period, so the communication between the members was not convenient, but I was grateful for the guidance of the teacher, so that I first

realized the fun of being the captain to complete a project. Finally, this project also won the second prize of China Computer Design Competition, so it left me a deep impression, which also improved my interest in scientific research.

该项目旨在测量和评估国家高等教育系统的健康状况并且确定其可持续发展的状态。我们整体使用了基于熵权法的 Topsis 模型。首先利用熵权法求出各个评价指标的权重,然后套入建立好的 Topsis 模型求出健康系统的得分,接着使用灰色预测模型对健康系统的可持续性进行了验证,最终成功利用建立好的模型对高等教育系统的健康情况进行了评估。

The project aims to measure and assess the health status of the national higher education system and determine its state of sustainable development. We used the Topsis model based on the entropy weight method . Firstly, the entropy weight method is used to calculate the weight of each evaluation index, and then the established Topsis model is incorporated to calculate the score of the health system. Then, the grey prediction model is used to verify the sustainability of the health system. Finally, the established model is successfully used to evaluate the health of the higher education system.

4、介绍一下本科所学的专业:

我本科专业是计算机科学与技术专业,主要是为了培养计算机专业人才。能够掌握计算机硬件、软件与应用的基本理论、基本知识和基本技能与方法。我们学过比较多的专业课,像是数据结构、计算机网络、数据库原理等,我在这几门学科里面也取得了比较好的成绩。

My undergraduate major is computer science and technology, mainly to cultivate computer professionals. Can master the basic theory of computer hardware, software and application, basic knowledge and basic skills and methods. We have learned more professional courses, such as data structure, computer network, database principle, etc. I have also made good achievements in these disciplines.

1、介绍杭州:

杭州是典型的江南水乡、风景优美。在经济发展上,杭州作为新一线,互联网带动了城市经济发展,毕竟马云的阿里巴巴在杭州的作用发挥到极致,程序员的岗位就业人员不断增加。所以杭州算是生活节奏适中,在杭州生活,工作紧张之余,也可以感受到杭城的风雅时光。

Hangzhou is a typical Jiangnan water country with beautiful scenery. In economic development, Hangzhou as a new front-line, the Internet has led to the city ' s economic development, after all, Ma Yun ' s Alibaba in Hangzhou, the role played to the extreme,so the demand for programmers is growing. Therefore, Hangzhou is a moderate pace of life. When living and working in Hangzhou, it can also feel the elegant time of Hangzhou.

黑龙江省位于东北,是一个很热情的城市,可能最明显的一个特点就是在冬天太冷了,但是冰雕也因此特别漂亮,很多人来这旅游。对于经济发展,可能黑龙江的互联网产业不是特别多,比较重视工业。

Heilongjiang Province is located in the northeast, and it is a very enthusiastic city. Perhaps the most obvious feature is that it is too cold in winter, but the ice sculpture is

also particularly beautiful, and many people come to visit. For economic development, perhaps Heilongjiang Internet industry is not particularly much, more emphasis on industry.

<https://wenku.baidu.com/view/46bfa4d9ce2f0066f53322bb.html>

毕业 5 年可以做什么：

我对我毕业之后的计划有两个规划，首先是受我爸爸的影响，因为他是一名老师，所以我可能会继续攻读博士，然后去做一名大学老师，一直继续我的研究。还有一种规划是可能会从事有关机器人或者人工智能的工作，因为我对这两个方向比较感兴趣，所以希望进入大公司能够负责一些项目的完成。但是人生还是有很多意想不到的机会，希望我能够提高自己的能力，抓住每一个机会

I have two aspects of my plan after graduation, first influenced by my father, because he is a teacher, so I may continue to study for a doctor, and then to be a university teacher, continue my research. Another plan is that it may be engaged in the work of robots or artificial intelligence, because I am more interested in these two directions, so I hope that entering large companies can be responsible for the completion of some projects. But life still has many unexpected opportunities, hope I can improve their ability, seize every opportunity

<https://wenku.baidu.com/view/446582b603768e9951e79b89680203d8cf2f6a7f.html>

你的缺点是什么：

What are your shortcomings?

我之前一直觉得我的主要缺点可能是不太敢于表达自己，每次到自己演讲或者发表言论的时候，总是很胆小，但是我最近有经常去模拟面试来提高自己的胆量，这也让我在面对提问或者面试时候能更加得心应手。

I used to think that my main drawback might be that I didn 't dare to express myself. Every time I make a speech or spoke, I was always timid, but I 've recently had a lot of time to simulate interviews to improve my guts, which makes me more comfortable with questions or interviews.

在竞赛中的收获:

首先通过这个竞赛,我掌握了开发安卓平台的能力,然后提高了我的团队合作精神,因为是作为队长,所以也提高了组织能力。最主要因为是第一次真正参与到科研之中,所以我对科研的兴趣日益浓厚,这也为我之后的科研工作起到一定的鼓舞作用。还掌握了写论文的能力,最后也是成功发表一篇论文。并获得中国计算机设计大赛国赛二等奖。

First of all, through this competition, I mastered the ability to develop Android platform, and then improved my team spirit, because as the team leader, I also improved the organizational ability. The most important reason is that I really participated in scientific research for the first time, so my interest in scientific research is growing, which also plays a certain role in encouraging the scientific research work after me. Also mastered the ability to write papers, and finally published a paper successfully. And won the second prize of China Computer Design Competition.

介绍家庭:

我们的家庭是一个典型的东北式家庭。父亲很温柔,是一名老师,母亲很严厉,做的不对的时候总是严厉的指正。家族共有四人。我有一个比我大12岁的姐姐,她从小就很照顾我,因此,我从小就受到家人的喜爱。父母也会给我决策的机会。家庭氛围从小相对自由。这也让我上大学之后可以选择自己喜欢的专业,朝着自己喜欢的方向努力

Our family is a typical northeast family. Father is very gentle, is a teacher, mother is very severe, do wrong when always Make severe corrections There are four families. I have a 12-year-old older sister, she has taken care of me since childhood, so I have been loved by my family since childhood. Parents will also give me the opportunity to make decisions. Family atmosphere has been relatively free since childhood. It

also allows me to choose my favorite major after going to college and make efforts in the direction I like.

Why do you want to go to graduate school? (你为什么想读研究生)

我从以下几个方面进行回答，首先我对计算机领域具有浓厚的兴趣，所以希望在研究生阶段能继续进行研究来充实自己，其次我觉得本科生的学习可能不够深入所以我希望研究生阶段能够继续学习来提升自己，最后我希望可以真正参与到一项科研项目中并发表高水平论文，然后我觉得这个学院很

I answer from the following aspects. First of all, I have a strong interest in the computer field, so I hope to continue to study in the postgraduate stage to enrich myself. Secondly, I think that the study of undergraduate students may not be deep enough, so I hope that the postgraduate stage can continue to study to improve myself. Finally, I hope that I can really participate in a scientific research project and publish high-level papers, and I think that this college is very

大学最有成就感的事情：

性格特点：

我有以下几个性格特点，首先我是一个很认真的人，就像我对待比赛或者科研，都是全身心投入的，其次我是一个很坚持的人，即使遇到我不会的问题我也不会轻易放弃，然后我是一个努力工作的人，就像我对科研感兴趣，我就会努力学习新知识，最后我是一个乐观热情的人，所以在团队中能和队员积极沟通，可以帮助大家缓解压力

I have the following characteristics. First of all, I am a very serious person, as I treat competitions or scientific research with all my heart and soul. Secondly, I am a very persistent person, and I will not give up easily no matter whether I have touched this topic before.. Then I am a hard-working person, as I am interested in scientific research, and I will work hard to learn new knowledge. Finally, I am an optimistic and enthusiastic person, so active communication with members in the team can help relieve stress.

What would you most like to study? (你最想研究什么)

首先我选择机器人这个项目就是说明我对这方面是感兴趣的,因为我曾经参加过一个比赛,涉及到单片机的知识,我花了两个月的时间自学硬件知识,并对他产生了兴趣,最后取得了国赛二等奖,这证明我是有一定的领悟能力的,而且我知道机器人是需要这方面的知识的,对于机器人和人工智能技术是我将来想要研究的方向,因为我是计算机科学与技术专业,一些涉及到的算法可以用到人工智能上面,对于机器人我也有硬件知识的储备,我希望将来可以做这两者结合的一个研究方向

First of all, I chose the robot project to show that I am interested in this aspect. Because I have participated in a competition, involving the knowledge of micro control system 51, I spent two months learning the hardware knowledge by myself, and have an interest in him. Finally, I won the nation second prize, which proves that I have a certain understanding ability, and I know that robots need this knowledge. For robots and artificial intelligence technology, I want to study in the future. Because I am a professional of computer science and technology, some algorithms involved can be used in artificial intelligence, and I also have a reserve of hardware knowledge for robots. I hope that I can do a research direction of the combination of the two in the future.

major weaknesses and countermeasure (弱点以及对策)

5.你在日常的学习生活中的优缺点?

6.该专业在国外的研究进展,你是否有所了解? 你是否涉猎相关期刊与著作?

7.你读过哪些专业方面的书籍或文献，请举例说明作者的观点以及你的想法。

8. 谈谈你已经发表的论文，或者本科毕业论文的选题与思路？

9. 你觉得电脑对我们影响有多大

10.你现在学习什么语言，为何选择这种语言

最喜欢的老师：

One of my favorite courses should be data data structure teacher, because our lecturer pays great attention to practice, he often helps us debug the code himself, which also makes me feel the joy of programming for the first time. It has an impact on my subsequent research competition and finally has achieved more than 90 points, which impresses me. And then I participated in our teacher ' s project. In this project, he taught me a lot of knowledge, including how to coordinate team communication, how to carry out scientific research, and how to write high-level papers, so I am grateful to my data structure teacher.

<https://wenku.baidu.com/view/46bfa4d9ce2f0066f53322bb.html>

Describe a sorting algorithm that you are familiar with

比较经常使用的排序算法的快排，他就是先选择第一个数作基准，然后把比基准小的数放左边，大的数放右边，然后在小的这部分在选择基准进行递归，大的部分也一样，直到排序完成

The sorting algorithm I often use is quicksort , he selects the first number as the benchmark, and then puts the number smaller than the benchmark on the left side and the number larger on the right side, and then recursively selects the benchmark in the small part, and the large part is the same until the sorting is completed.

Which lesson do you think is the most import in your college life?

我认为计算机专业最重要的一门课是数据结构，因为他是算法的基础，是让我进入编程世界的第一门课，很多算法比赛都要应用到数据结构的知识，而且学习数

据结构可以提高编程能力，无论在工作或者研究上面编程能力都是很重要的，因此数据结构是一门基础学科，也是最重要的一个科目

I think the most important course in computer science is data structure, because it is the basis of algorithm and the first course to let me enter the programming world. Many algorithm competitions apply to the knowledge of data structure, and learning data structure can improve programming ability. It is very important whether in work or research, so data structure is a basic subject and the most important subject.
