

Software Modeling and UML

The use of UML tools

Objectives

- Based on the demo, become familiar with the use of UML tools (such as Rational Rose) and its modeling environment
- Learn the use of other popular UML tools
- Compare different UML tools

Topics

- Basic use of popular UML tools
- Modeling environment of UML tools
- Try to draw the various modeling elements
 - Include: class, use case, actor
 - Modeling the relationship between the elements
- Installation of other UML tools
- Draw a variety of modeling elements in other UML tools

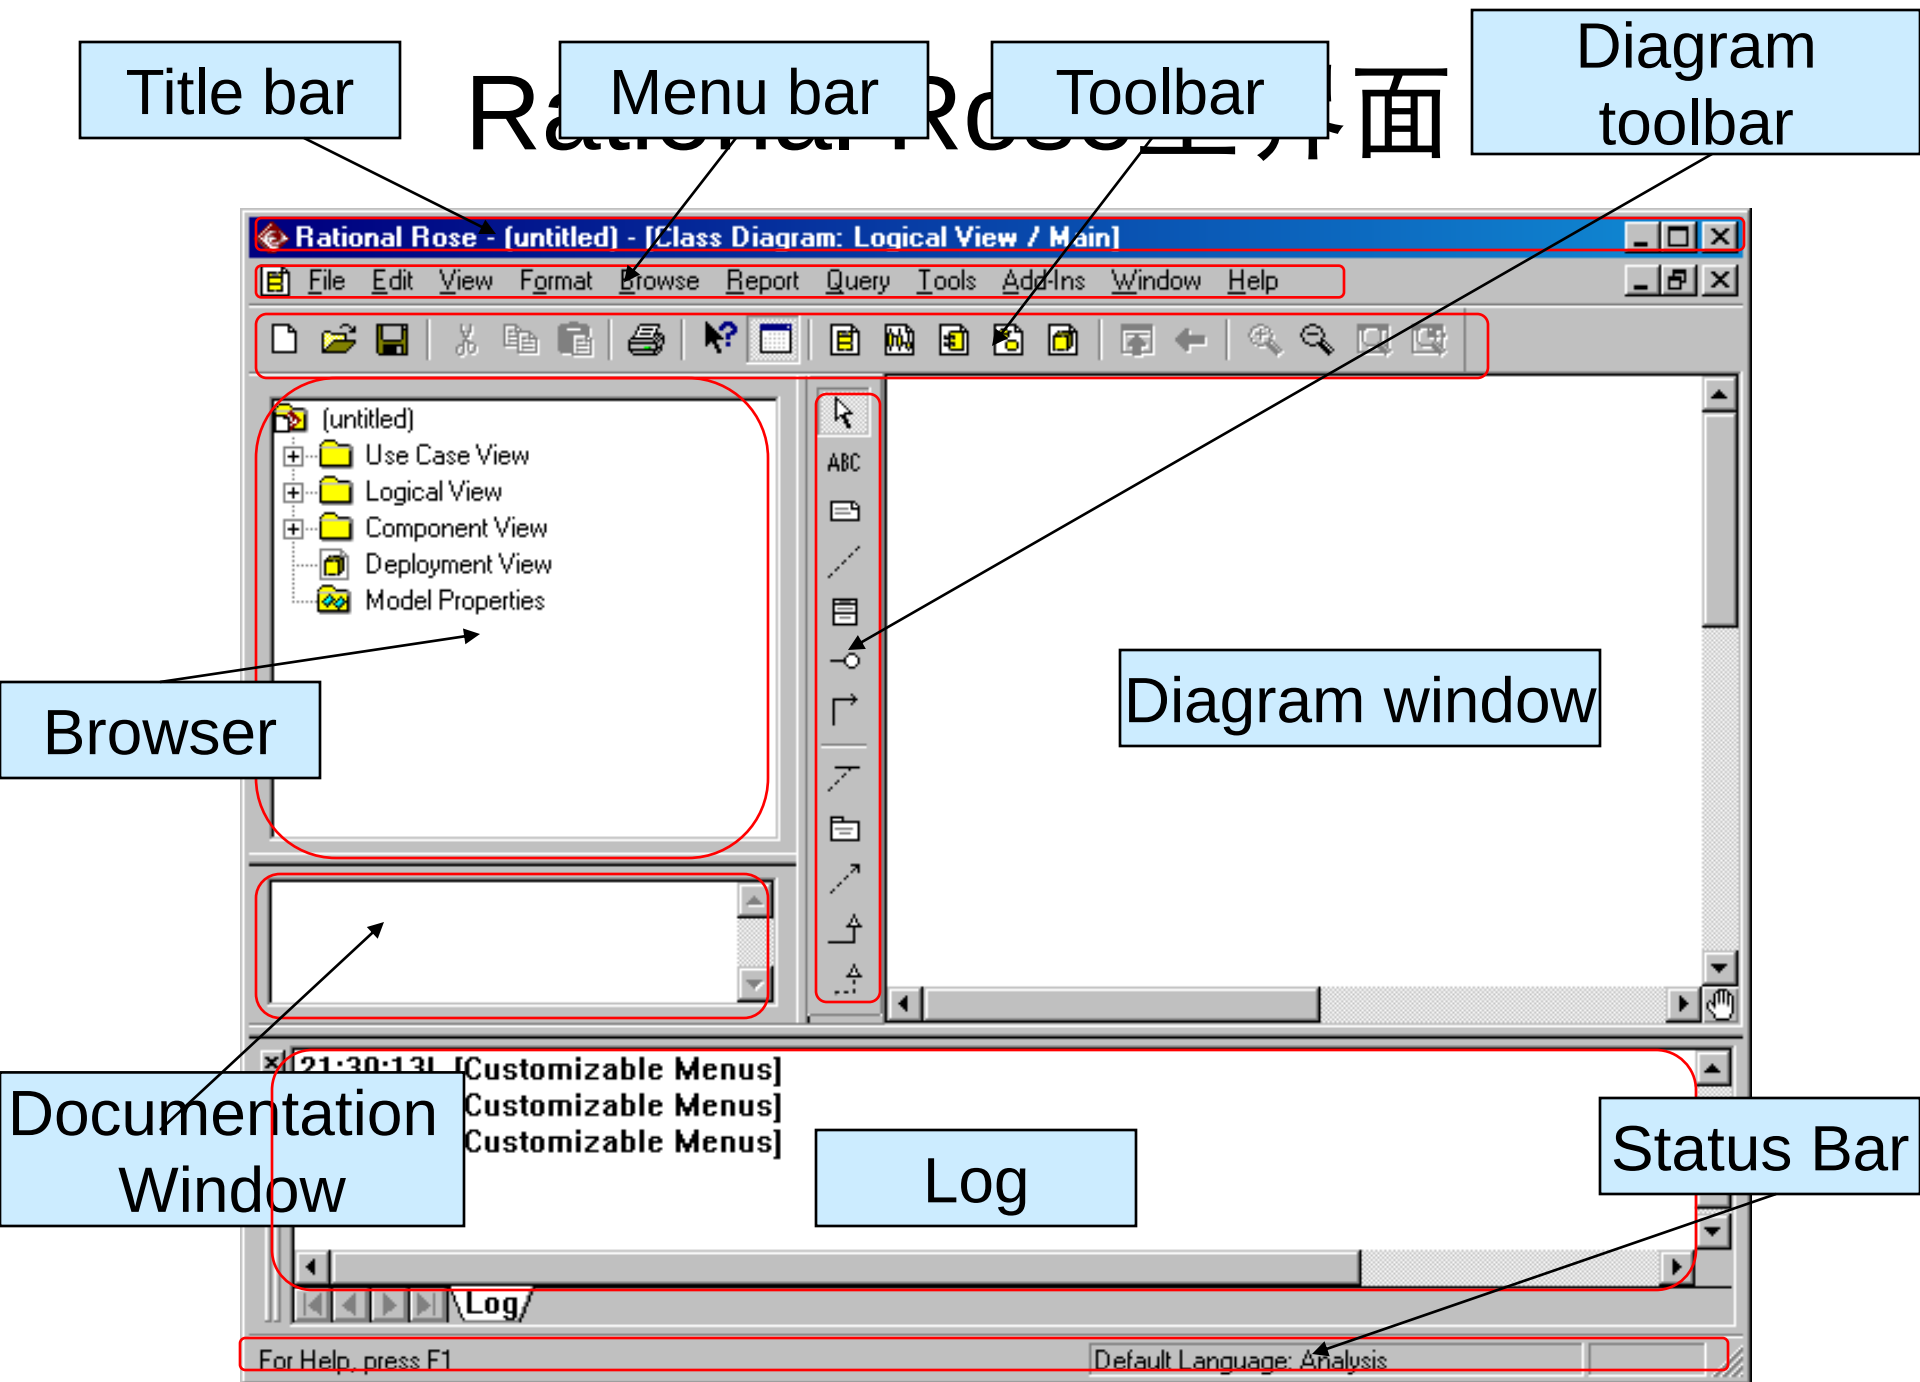

UML Tools

- <http://www.umlchina.com/Tools/Newindex1.htm>
- You can research and find the most up-to-date UML tools commonly used nowadays.

Some well-known UML tools

- Rational Rose
- Enterprise Architect
- JUDE
- StarUML
- WhiteStarUML
- Visual Paradigm for UML
- Other online UML tools
-

Rational Rose 主界面

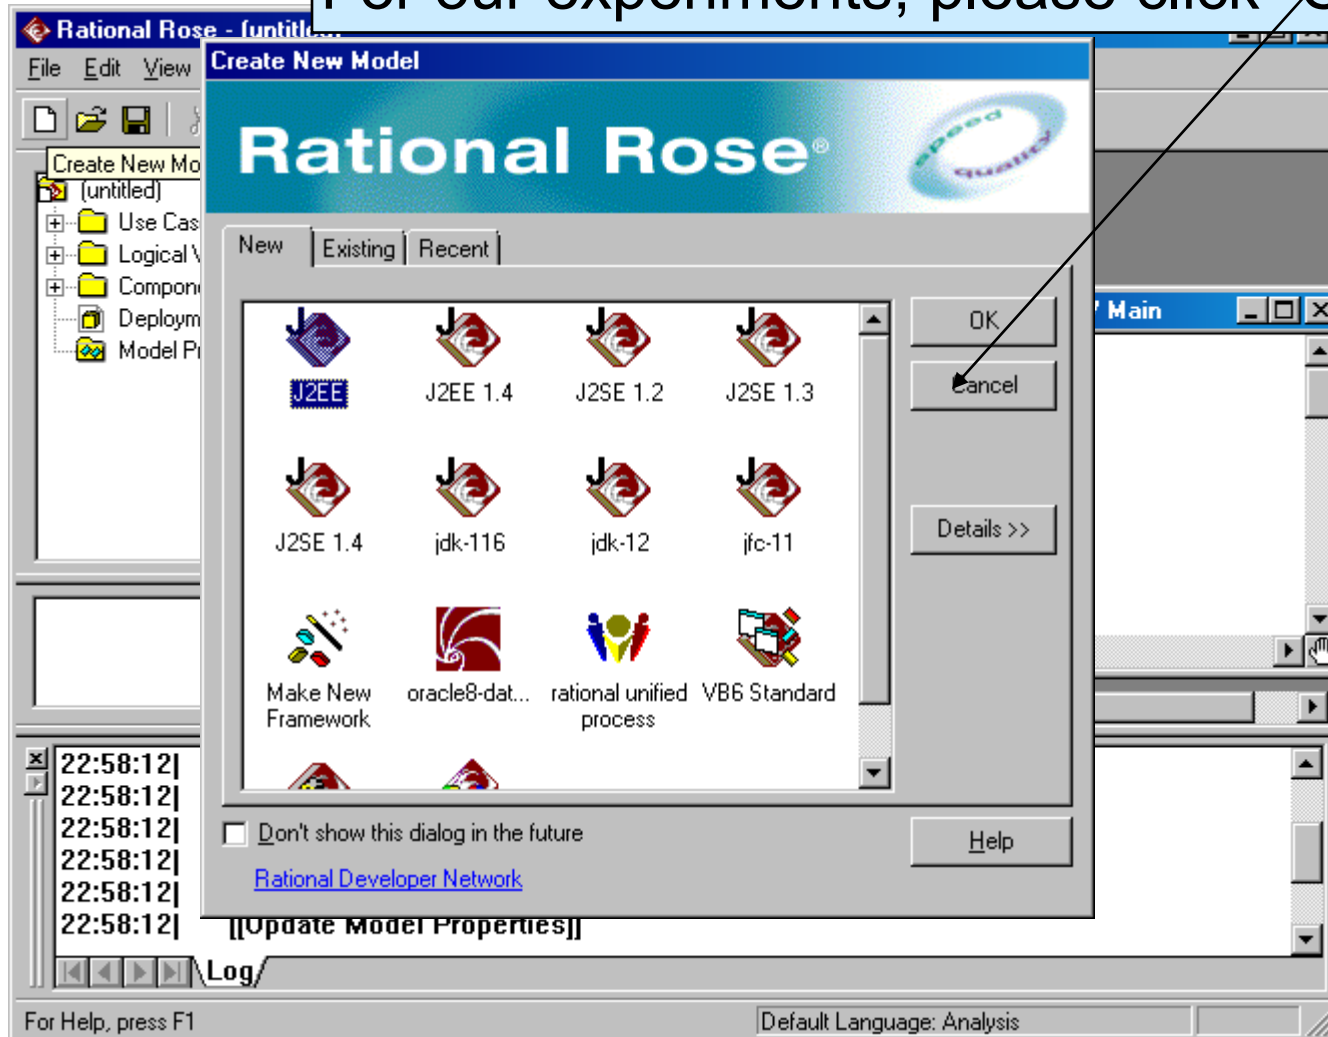

Basic operation of Rational Rose modeling

- Create a model
- Save the model
- Global options setting
-

Create a model

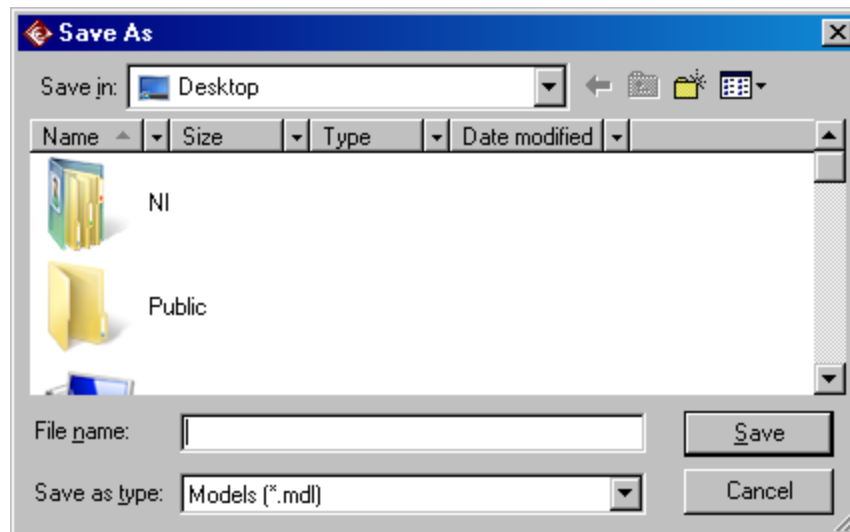

For our experiments, please click “Cancel”

Save the model

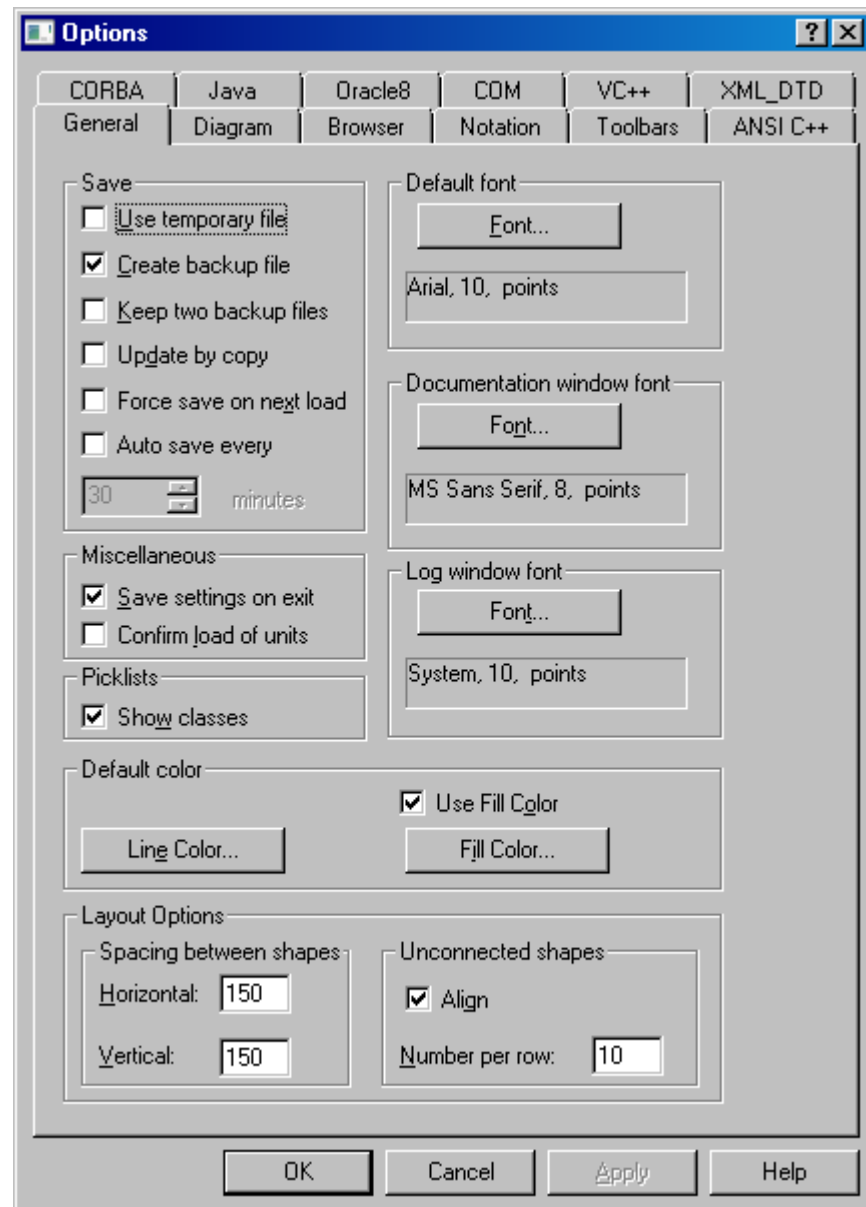

- Mdl file

- This file contains all of the model diagram, objects, and other model elements

Global options setting

- Tools → Options
- Setting of fonts
- Setting of color

Skilled use of tools requires
exploration in practice

- Rome Wasn't Built in a Day

Please complete the following tasks

- 1. Utilize a UML tool to create a model file.
- 2. Within the model file, attempt to generate various UML diagrams supported by the tool.
- 3. In the UML diagrams, try creating modeling elements using the available tools.

Please consider the following questions

- 1. What views are offered by the UML tool?
- 2. Which UML diagrams are supported by the UML tool?
- 3. In a specific view, which UML diagrams can be modeled?
- 4. How about other tools, such as Visual Paradigm for UML, StarUML.....

Please send me the work

- Please complete the quiz in the attached Word document and send your work through the link provided by the teaching assistant's cloud storage.
- Requirements for the report
 - Report name: "Student ID Name UML Task1 UML Tools"
 - Please do not compress any document (不要压缩)
 - The deadline for task submission is 6 PM this Wednesday evening
- Make sure to send the report following the specified guidelines; otherwise, we will not be able to receive your submission.
