

Evaluation Standards for “Operating Systems (English)” Course

1 Overall Evaluation Composition

BJSL0081 - Operating Systems					
Semester	Semester 3 (Spring)				
# of Hours	Lecture	Mid-term	Discussion	Lab Work	Total
	58 hours	2 hours	4 hours	8+16 hours	72+16 hours
Assessments	2-hour	100-min	Performance/	Lab Work	-
	Final	Mid-term	Exercise	Evaluation	
	60%	15%	10%	15%	100%

2 Assessment Criteria

1. Final exam (60%)
2. Midterm exam (15%)
3. Regular assessment (10%)
 - (a) Attendance and classroom participation (5%)
 - (b) In-class assignments and after-class homework. (5%)
 - Plagiarism is strictly prohibited. Violations will result in a score of zero for the overall grade.
4. Lab work (15%)

(a) Mandatory lab work (12%)

- Each student must complete the assigned lab work individually and submit a report. The lab work should be successfully conducted, and the report should be concise. A score of 12 will be given for meeting these requirements. If there are difficulties in completing the lab work, detailed descriptions of encountered problems and attempts to solve them can be included in the report. Depending on the specific issues, a score of 10-12 can be awarded.
- Plagiarism is strictly prohibited. Violations will result in a score of zero for the lab work grade.

(b) Optional lab work (3%)

- Optional lab work can be carried out individually or in small groups. If completed in a group, only one lab work report needs to be submitted. Members of the same group will receive equal scores for optional lab works, and the scores will be adjusted based on the difficulty of the lab work and the number of participants. It is required that the lab works be successfully completed, the reports be concise, and the lab work procedures be provided. If encountering difficulties in completing the lab work, detailed descriptions of the encountered problems and attempted solutions should be included in the lab work report.

5. **Awarded credit ($\leq 3\%$)**

- (a) When considering extra credit, prioritize experiments with higher difficulty, lower participant count, and higher completion rates. This additional credit should not exceed 2 points and can be obtained alongside regular experiment scores and other extra credit options.
- (b) Students are required to actively engage in specialized presentations (15-20 minutes each), which demand well-crafted PowerPoint slides, clear logic, comprehensive coverage of the topic,

and the ability to accurately address related questions or facilitate class discussions. Throughout the semester, there are up to three opportunities for such presentations: one on TrustZone, another on Micro-Architectural Attacks, and a third on Return Oriented Programming (ROP). A brief overview can be found in the course resources index links. This extra credit opportunity does not exceed 1 point.

- (c) Students are expected to actively engage in paper presentations (10-15 minutes each) where they summarize the latest research in the field of operating systems based on recent articles from SOSP and OSDI. Presentations should include well-crafted slides, clear logic, comprehensive coverage of paper content, and the ability to accurately address questions or stimulate class discussion. Each student may present up to four times during the semester. This component offers a maximum of 1 extra credit point.
- (d) Participation in the development of course resources, such as lab manuals, material gathering, reusable documents, and PowerPoint presentations, is encouraged. Extra credit is determined based on actual contribution, capped at a maximum of 3 points.

3 Evaluation criteria for the lab works

Option 1: Linux+Xv6

Platform	Contents	Type	Assessments		
			Mandatory	Optional	Awarded
Linux	Reverse	Mandatory 1 out of 3	6	×	×
	Unix Utilities				
	Unix Shell				
	Map Reduce	Optional	×	3	√
Xv6	Xv6 Syscall	Mandatory	6	×	×
	Xv6 Kernel Threads	Optional	×	3	×
	Xv6 Scheduling	Optional	×	3	×
	Xv6 Virtual Memory	Optional	×	3	√
	File System Checker	Optional	×	3	√

Option 2: openEuler

Platform	Contents	Assessments		
		Mandatory	Optional	Awarded
openEuler	openEuler Kernel Modules	12	3	√

4 Guidance to effortlessly achieve high scores

Note: The strategies outlined in this section are intended solely as learning recommendations and do not guarantee or constitute any assurance of academic performance.

- The target score is 70 points.

Task	Workload	Guidance
Regular	-	Strive for perfect attendance; notify in case of absence.
Lab work	16-32h	Focus solely on mandatory lab works.
Review	8-16h	The concepts mentioned in the Schedule. All exercises in and after class.

- The target score is 80 points.

Task	Workload	Guidance
Regular	-	Strive for perfect attendance; notify in case of absence.
Lab work	40-80h	Complete mandatory lab works, participate in optional lab works.
Review	16h	The concepts mentioned in the Schedule. All exercises in and after class. Synchronization puzzles.

- The target score is 90 points.

Task	Workload	Guidance
Regular	2-4h	Strive for perfect attendance; notify in case of absence. Actively engage in classroom discussions.
Lab work	60-80h	Complete mandatory and optional lab works.
Review	16-24h	The concepts mentioned in the Schedule. All exercises in and after class. Synchronization puzzles.

- The target score is 95 points.

Task	Workload	Guidance
Regular	16h-?	Strive for perfect attendance; notify in case of absence. Actively prepare and deliver presentations.
Lab work	60h-?	Complete mandatory and optional lab works. Compile an instructional manual.
Review	16h-?	The concepts mentioned in the Schedule. All exercises in and after class. Synchronization puzzles.
